

Muhammad Tamoor Arif

PROJECT MANAGER

✉ tamoorarif44445@gmail.com ☎ 03429465227 📍 Lahore, Pakistan

Professional Summary

Results-driven Project Management and Lead QA Engineer with 4.5+ years of experience supporting end-to-end project lifecycles, organizing complex initiatives, and ensuring timely delivery across cross-functional teams. Skilled in project planning, stakeholder communication, and risk management with strong command over JIRA, MS Project, and SDLC processes. Proven ability to lead QA efforts, streamline testing cycles, and deliver high-quality product outcomes. Adept at building executive-level reports, tracking project progress, and driving clarity in fast-paced, deadline-driven environments.

Professional Experience

Associate Project Manager, Consultancy Outfit

05/2024 – Present
Lahore, Pakistan

Projects Handled:

- Supported multiple projects across the full SDLC by coordinating schedules, resources, and cross-team communication to ensure timely delivery.
- Organized and facilitated stakeholder meetings, documented key decisions, and followed up on critical action items to maintain project alignment.
- Created and presented weekly progress reports for management and executives, highlighting risks, timelines, and project health status.
- Monitored project plans and timelines in JIRA/MS Office, proactively identifying risks and recommending mitigation strategies to avoid delays.
- Collaborated with development and QA teams with strong understanding of development and testing cycles, ensuring smooth execution of project deliverables.

Senior/ Lead QA Engineer, Consultancy Outfit

04/2024 – Present
Lahore, Pakistan

Projects Handled:

- PeopleCreeds: A complete HR solution including modules for recruiting, onboarding, HR posting, performance management, and time logging.
- Share My Dine: Platform for restaurant owners to share menus and enhance food discovery.
- Mortgage Basket: Ecommerce-style portal offering mortgage comparisons from multiple banks.
- FosterMatch: Foster care management system facilitating carer-child matching.

Responsibilities:

- Planned, led, and executed end-to-end QA strategies across web/mobile platforms.
- Built and maintained automated test cases using Cypress for regression and functional testing.
- Conducted grey box testing and collaborated on system architecture reviews.
- Managed QA team activities, test coverage, and execution timelines.
- Reported bugs and tracked defect resolutions via JIRA. Interfaced with developers, product owners, and stakeholders to ensure quality goals.
- Delivered detailed QA documentation including test plans, cases, and progress reports.
- Mentored junior testers and allocated QA tasks to meet sprint goals.

Mid-level QA Engineer, Consultancy Outfit**04/2022 – 04/2023**
Lahore, Pakistan

- Coordinated day-to-day project activities, maintained project schedules, and ensured timely completion of tasks across cross-functional teams.
- Organized stakeholder meetings, documented minutes, tracked action items, and supported clear communication between teams and management.
- Assisted in project planning, reporting, and risk tracking using tools like JIRA and MS Office to support smooth project execution.
